

# National Accreditation Board for Testing and Calibration Laboratories

(A Constituent Board of Quality Council of India)

18/05/2021

## QR Code on the Test Reports / Calibration Certificates

Labs should provide QR code on all test reports/calibration certificates issued which can be scanned using any QR scanning application available on mobile / any devices to authenticate and reproduce the test report/calibration certificate online.

This will prevent the manipulation of test results/calibration data & the circulation of forged test report/calibration certificate in the market. Interest of the consumer / end user of the product and the reputation /Image of the lab are also protected.
